OUR ACTIVITIES

Silver Polymer offers highly durable woven bags made from 100% virgin polypropylene, available in various colors and dimensions up to 80 cm in width and 150 cm in length.

Our versatile bags are suitable for multiple industries, including milling, livestock feed, secondhand clothing, cereal, sugar, chemicals, spices, cotton, coal, and more.

WHY SHOULD YOU CHOOSE US ?

At Silver Polymer, a quality control process is ensured throughout the manufacturing process by our qualified and competent engineers. Quality control is carried out using highly advanced specialized equipment, which ensures that our clients requirements and needs are met.

METHODOLOGY, PRODUCTION APPROACH, AND MANAGEMENT

Silver Polymer employs an empirical methodology that combines several management strategies, such as agile methods, the Lean Six Sigma approach, and Kanban. Transparency, collaboration, and adaptation to change are among our core organizational values. More than ever, Silver Polymer relies on digital technology to enhance performance, drive innovation, improve the customer experience, and ensure the longevity of its informational assets.
